

May 30, 2004
Hi,

I have been a loyal listener of XM radio of almost a year now and love it. I have to travel quite a bit and it provides what I need- Up to date information with easy access, also with great stations that play my favorite type of music (alternative) without commercials. The d.js. only make relevant input about what band members are doing what, where, and with whom - and what projects they are working out! I find the best time of my life is spent in my car listening to my XM Radio.

I pay for this service. I love this service. I am from the MTV generation- yes I want my MTV- and I have my MTV- now I have my XM Radio- and I want to keep my XM radio! I cannot imagine life without it! It is that good!

One of my tech friends turned me on to XM and now I am hooked- now I have hooked others- we now do not know what we would do without it. I also work as a teacher in Loudoun County and many of the parents promise their kids XM radio if they get good grades, I think that is a great incentive.

Most of the FM stations are so lame. Commercials, commercials, commercials, talking, talking, talking, I want good music. Yes I like the stations like "Air America" but like many Americans we like choice. Isn't that what is really about- choice. This XM invention is one of the coolest inventions I have come across in a long while- it is too cool!

I will do whatever it takes to keep this happening. I am very passionate about my XM Radio- and you cannot thwart technology- it is out there and it is here to stay- so deal with it!
